SUMMARY

Frontend Developer and Diploma Computer Engineering student with experience building AI-powered web applications and dashboard-based systems through hackathons and real-world projects. Skilled in HTML, Python, frontend UI/UX, database basics, and real-time integrations, with experience developing inventory, management, and geospatial platforms with AI chatbot and automation features. Also experienced in digital ad campaign interfaces and design-focused implementations. Seeking a Frontend / Web Developer role to deliver scalable web solutions and grow in AI-integrated development.

EXPERIENCE

Frontend Developer | UI/UX & Digital Marketing Executive

Wavelength Enterprises

October 2025 - Present, Vasai East

- Revamped user interfaces for multiple client projects by integrating responsive design principles and collaborating closely with designers and marketers to deliver cohesive visual identities across platforms.

Junior Accountant

Lilavati Product

June 2022 - Present, Vasai East

- Streamlined daily accounting documentation and transaction tracking by digitizing records and ensuring timely updates, supporting ongoing financial accuracy and compliance at Lilavati Product.

PROJECT

Medicine Management Inventory System with Expiry Alerts & AI Voice Assistant

January 2026 - Present

- Built real-time medicine stock tracking with batch-wise inventory records
 - Implemented expiry-date monitoring with automated near-expiry alerts
 - Developed low-stock alert system for timely replenishment
 - Integrated AI voice/chat assistant for quick inventory queries and operator support
 - Reduced manual inventory errors through automated validation and tracking
 - Improved pharmacy workflow efficiency and decision-making with smart alerts and reports

AI-Enabled Student Management System with Multi-Role Dashboards

February 2026 - Present

- Orchestrated development of an AI-enabled Student Management System for academic workflow automation
 - Designed and implemented multi-role dashboards for Admin, Teacher, and Student users
 - Built role-based access control for secure and structured data visibility
 - Developed attendance tracking system with centralized record storage
 - Created advanced analytics and visualization dashboards for performance monitoring
 - Implemented automated low-attendance email alerts for early intervention
 - Improved operational transparency across stakeholders
 - Reduced administrative workload through automation and centralized manage

AI Beach Safety & Discovery Web Application

September 2025 - Present

- Developed an AI-powered Beach Safety & Discovery Web Application for Smart India Hackathon 2025
 - Implemented geospatial map-based search and route navigation features
 - Integrated AI chatbot support for safety guidance and user interaction
 - Connected real-time environmental data APIs (wind, soil, water quality)
 - Built interactive 360° virtual view exploration modules
 - Added news integration system for beach safety and condition updates
 - Designed database-driven safety analytics for monitoring and insights
 - Delivered responsive frontend UI and data visualization dashboards

EDUCATION

Diploma in Computer Engineering

Viva Institute of Technology · Virar East · 2027 · SEM 3 8.7 GPA

CERTIFICATIONS

Finalist On AI Hackathon 2.0 – GDG Mumbai

Google Developer Group · 2026

- This certificate is relevant because it validates my hands-on experience in an AI-focused hackathon organized by Google Developer Group Mumbai. I worked on real problem-solving, team collaboration, rapid prototyping, and practical AI/tech project development under time constraints. It demonstrates my applied technical skills and innovation ability.

1st Prize Winner HACK YOUR WAY Technocrat 2.0

Agnel Polytechnic, Vashi · 2026

- This certificate is relevant because it demonstrates my practical technical and problem-solving skills proven through a competitive hackathon where I secured 1st place. It reflects my ability to build real solutions, work under deadlines, collaborate in a team, and deliver innovative project outcomes.

1 Prize On Gyantech Hackathon 2026

Gyanodaya Degree College · 2026

- This certificate is relevant because it proves my practical technical and problem-solving ability through a competitive hackathon where I secured 1st place. It demonstrates innovation, project development skills, teamwork, and the ability to deliver working solutions under time constraints.

Internal Selection On Smart India Hackathon 2025

Viva institute of technology · 2025

- This certificate is relevant because it shows I was internally selected for the Smart India Hackathon based on my project idea and technical skills. It demonstrates my problem-solving ability, innovation mindset, and capability to develop practical solutions in a competitive evaluation process.

COURSEWORK

Graphic Design (DTP)

Applied creativity and design principles to create posters, social media graphics, layouts, and print-ready DTP materials using professional design tools.

- 2023 · Visual Design & Creativity
- Applied creativity and design principles to create posters, social media graphics, layouts, and print-ready DTP materials using professional design tools.

Professional Program in Python Language

GUVI & IITM Pravartak Technologies Foundation · 2026 · Python Programming & Logical Problem Solving

- Applied Python programming to write scripts, build logic-based programs, and solve coding problems using control structures, functions, and data handling.

SKILLS

Hard Skills

- .Python Programming (Core Basics, Logic Building)
- .HTML & Basic Web Development
- Frontend Development (UI Implementation, Layouts, Responsive Basics)
- .UI/UX Fundamentals
- .Graphic Design & UI Layout Design
- Database Fundamentals (Basic DB Operations)
- .My SQL
- .MS Excel & Google Sheets (Data Handling, Formulas)
- .Invoice & Billing System Handling
- .Basic Accounting Operations
- .Digital Marketing & Ad Campaign Management
- .Hackathon Project Development
- .AI & Prototype Development (Hackathon-Level Applications)

Soft Skills

- .Problem Solving
- .Analytical Thinking
- .Team Collaboration
- .Communication Skills
- .Attention to Detail

.Adaptability
.Project Execution Under Deadlines
.Initiative and Self-Driven Learning
